

Storyboard
Persona: Geno Smith, student athlete
Scenario: Finding time to study around practice

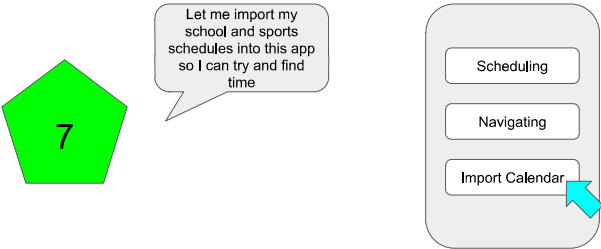

Currently is unorganized and manages time poorly so he can't get things accomplished

Time is being wasted due to a bed sense of time.

Needs to find time in the day to study since he is so busy with sports.

Selects import calendar feature.
Uses feature multiple times in order to put in all things he has to do in a week.

Uses scheduling feature in order to find spaces in his schedule to study.
Also shows estimated times to get to next location when locations for events are input.
